

QikFrame

QikFrame enables your choice of QikFit modules to be fitted into vertical panels 3mm to 13mm thick. Ideal for using the QikFit Modular system in desk screens, meeting pods and similar office furniture applications.

QikFrame is supplied complete with integrated fixing clips for quick and tool-less installation into pre-cut panels, without the need for fixing screws.

QikFrame is available in either black or white textured finish polycarbonate to match your QikFit module colour choice. Available in a single size, but with the flexibility of power, USB charging and Data/ AV QikFit modules to be fitted.

USPs

- Fits vertical panels from 3mm to 13mm thick
